

Gas supply boost for eastern suburbs – Lilydale Gas Pipeline

To meet the growing demand for gas in the outer eastern suburbs, Multinet Gas has commissioned a significant project to increase the capacity to transport natural gas to the region.

Multinet Gas is Victoria's largest distributor of natural gas and has contracted Jemena Asset Management to undertake the design, construction, operation and maintenance of a new transmission link (pipeline) approximately 10km in length along Victoria Road.

Initial surveying work commenced in May 2010, with pipeline construction due to commence between August and December 2011.

During construction of the pipeline, we anticipate minor impacts to traffic movement. Landowners and residents who may be more directly affected have been contacted in person by a project representative.

For further information, an information display will be set up at **Chirnside Park Shopping Centre** from **9am to 4:30pm** on **Thursday 28 and Friday 29 July 2011**. Project representatives will be available to answer any questions individuals may have.

Please note, the pipeline will be constructed in accordance with the Pipelines Act 2005 and Pipelines Regulations 2007. The relevant legislation also calls upon the Environment Effects Act 1978, the Planning and Environment Act 1987, the Land Acquisition and Compensation Act 1986, and the Aboriginal Cultural Heritage Legislation at State and Commonwealth levels.
