GAS SUPPLY SECURITY **Lilydale Gas Pipeline**

To meet current & rapidly growing demand in the outer eastern suburbs and to increase security of supply it has become necessary to increase the capacity of existing gas transmission pipelines that transport natural gas to the region.

Multinet Gas has contracted Jemena Asset Management to undertake the design, construction, operation & maintenance of a new transmission link approximately 10 km in length along Victoria Rd connecting the Lilydale Branch Pipeline at Maroondah Hwy to the Outer Ring Main in Yarra Glen.

The pipeline will be constructed in accordance with the Pipelines Act 2005 and Pipelines Regulations 2007. The relevant legislation also calls upon the Environment Effects Act 1978, the Planning and Environment Act 1987 the Land Acquisition and Compensation Act 1986, and Aboriginal Cultural Heritage Legislation at State and Commonwealth levels.

Construction of the pipeline cannot commence until a Licence for the pipeline has been applied for by Multinet and issued by the Minister for Energy and Resources. This involves the preparation of route survey, soil sampling, cultural heritage and environmental surveys. These will be undertaken during May-June 2010.

An information display will be set up at Chirnside Park Shopping Centre: 9:00am to 4:30pm Tue 25 May and Wed 26 May 2010. Project representatives will be available to explain the project, answer questions and receive community feedback.

Landowners who may be affected will be contacted in person by a Jemena representative.
